

What are Doctors Saying About SiteRx?

Sanjay Yathiraj, M.D. – NEUROLOGIST

“As other providers have noted, one of the difficulties with modern EMR systems has been identifying patient populations with particular diagnoses for research protocols. SiteRx has developed innovative and HIPAA-compliant software to identify research study candidates and place them in ongoing research protocols in a seamless manner. My search for a solution has been found!”

Charles Saha, M.D. – GASTROENTEROLOGIST

“When the current standard of care falls short, patients often wonder about clinical trials. SiteRx makes it easy for us to identify which patients are a good fit for local trials. We love that SiteRx supports the existing doctor-patient relationship and seamlessly becomes an extension of our practice!”

Lori Schneider, M.D. – NEUROLOGIST

“SiteRx offers a truly unique no-cost clinical trials platform that gives us a competitive advantage by providing our team with a workflow-friendly solution. The single solution lets our busy staff stay focused on patient care while enabling clinical research as a care option using powerful HIPAA secure software.”

What You Should Know

- Without physician-patient education, clinical trials will have a difficult time succeeding: **Today 86% of clinical trials do NOT reach recruitment targets within specific time periods.¹**
- Patients have a right to understand all care options, including clinical research.
- SiteRx enables clinical research as a care option by automating the patient matching associated with clinical trials. Today, SiteRx works nationally with providers in over 25 states and has over 2 million patients in the network.
