

Give Your Patients Access to Promising Clinical Trials

SiteRx's HIPAA-compliant software integrates with your EHR to identify qualified patient-trial matches for your approval. Once a patient has been approved by the physician and fully consents, SiteRx automates the registration process while protecting the existing provider-patient relationship.

Differentiated Patient Care

Patients have the right to understand all care options – including appropriate clinical trials. By integrating SiteRx into your care continuum you stay better informed and can educate patients about trials all within existing workflows.

Compensation

SiteRx provides fair market value compensation to you for your services in connection with the clinical trial matching and ongoing maintenance process.

Secure and Private

SiteRx's HIPAA-compliant software safely stores and encrypts patient data. Data is never sold or shared with third parties and the SiteRx technology is certified by 3rd party HIPAA specialist – Accountable.

Seamless Connectivity

SiteRx integrates with your existing EHR to automate the way patients are identified for trial placement.

Optimized Trial Matching

Using advanced software, SiteRx screens patient records for matches with qualified clinical trials and submits candidates to the treating physician for approval.

Simplified Trial Management

SiteRx makes it easy to submit qualified candidates and capture ancillary FFS payments in one easy-to-use, HIPAA-compliant platform.
